Node.js Setup
Tools for Native Modules
Optionally install the tools necessary to compile native modules.
Some npm modules need to be compiled from C/C++ when installing. If you want to be able to install such modules, some tools (Python and Visual Studio Build Tools) need to be installed.
Automatically install the necessary tools. Note that this will also install Chocolatey. The script will pop-up in a new window after the installation completes.
Alternatively, follow the instructions at https://github.com/nodejs/node-gyp#on-windows to install the dependencies yourself.

Set Environment variable:

Check node and npm versions (npm comes along with node.js)

Step 2: Install the TypeScript Compiler

To install the TypeScript compiler, you launch the Terminal on macOS or Linux and Command Prompt on Windows and type the following command:

```
npm install -g typescript
```

Current version the current version of TS compiler

```
tsc -v
```

```
C:\Users\pavan>npm install -g typescript

added 1 package in 750ms

C:\Users\pavan>tsc --version
Version 5.8.2
```

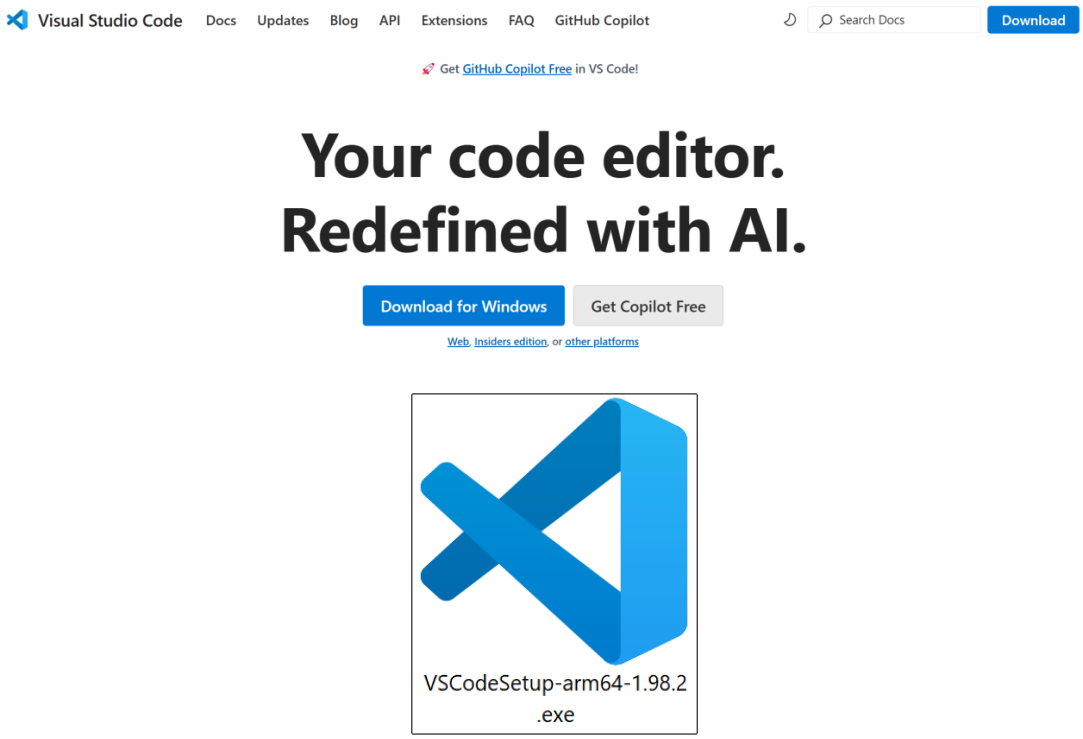

Step 3: Install TSX (Run TypeScript Without Compiling)

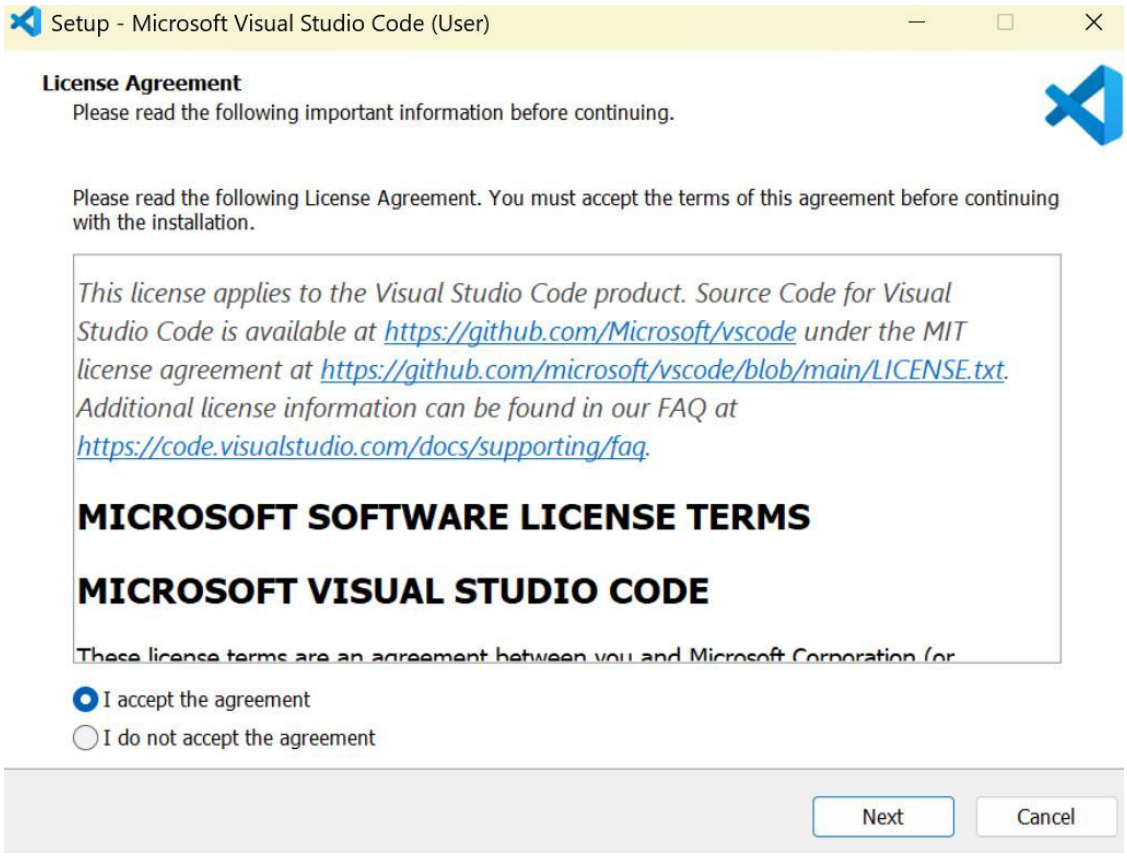

```
C:\Users\pavan>npm install -g tsx

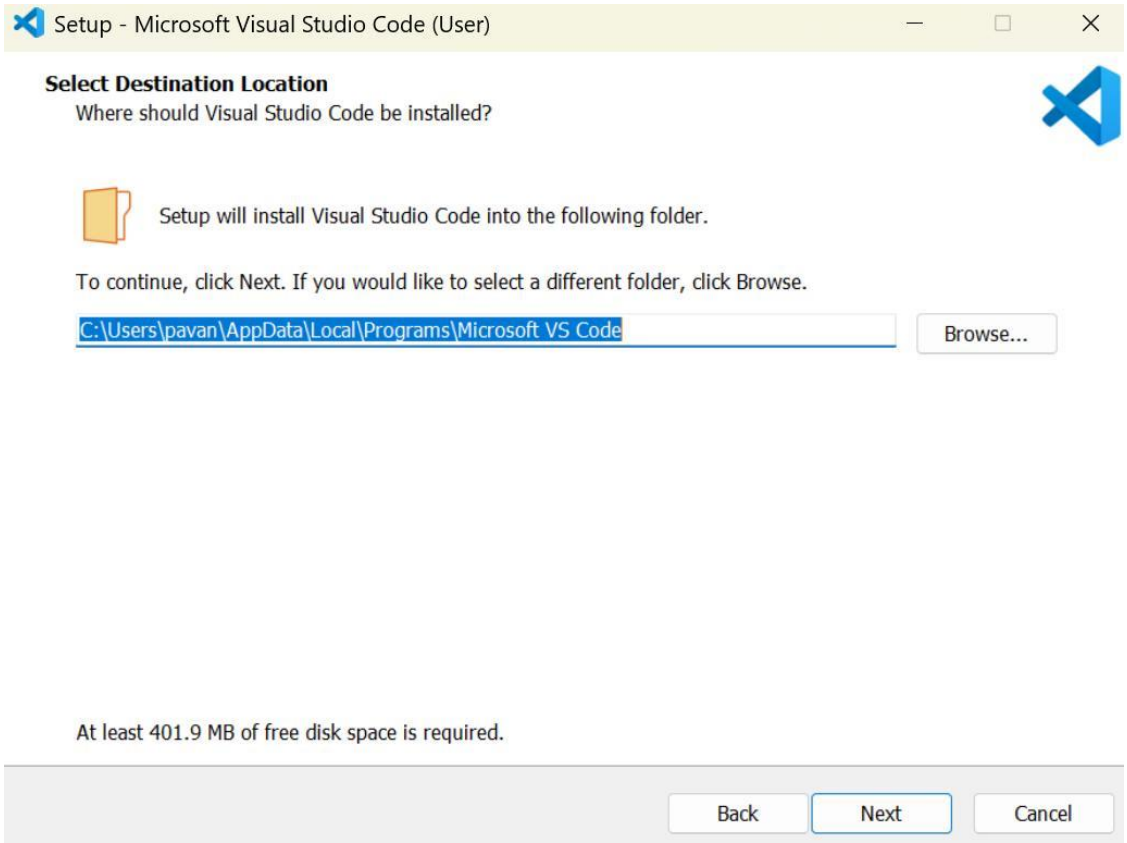

added 5 packages in 3s
```

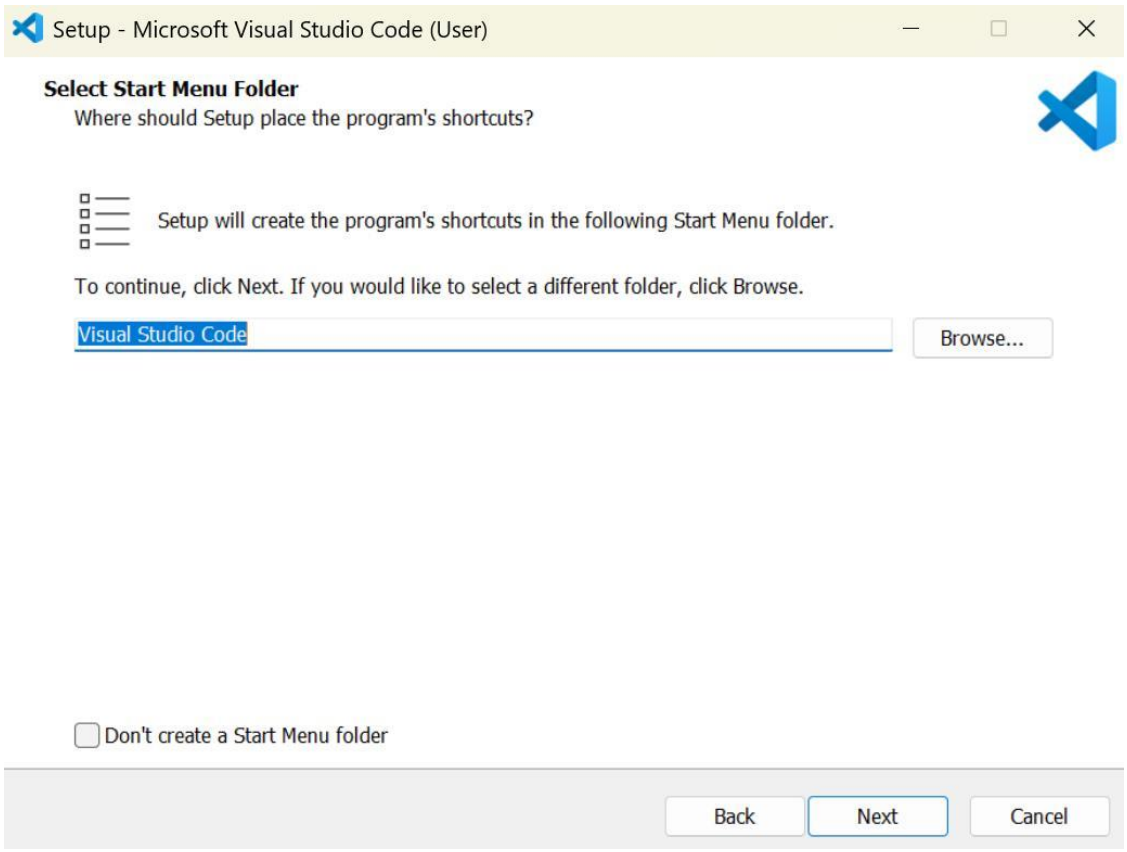

Step 4: Install VS Code
